Experience

Working

2014-Now **Sr. iOS Developer**, *Amalgama*, Buenos Aires, Argentina.
In charge of the iOS area of the company. Develop several applications in Objective-C and Swift using Agile methodologies:

- **Previando**

Previando is a mobile application to help previas find and connect with other previas near them. The application was develop in Objective-C, connecting to a RoR REST api.
AppStore

- **Vidbead**

Vidbead is a social network to share videos with your friends and reply to them also with videos, creating then a sort of video-story. Vidbead was develop using Objective-C, connecting to a RoR REST api.
AppStore

- **Dispatch**

Dispatch is a mobile application to help users of Milwaukee improve how they experience their neighborhoods by offering information about business, events and promotions near them. Dispatch was develop using Objective-C, connecting to a RoR REST api.
AppStore

2009-2014 **Web Developer**, *Insite*, Buenos Aires, Argentina.

Backend and frontend developer in PHP/JavaScript.

- Development of several websites for clients like HP, P&G and 3M. Of these sites we can remark:
 - Maintenance of the HP Argentina and HP Latam e-stores (new features, bugfixes).
 - Development of a social network for 3M using PHP (CakePHP Framework) with MySQL as the DB engine: www.espertiseclub.com.
 - Development of website targeted to odontologists, auxiliars and students of odontology for 3M Colombia using PHP (CakePHP Framework) with MySQL as the DB engine: www.esperiencias.com.co.
 - Development and maintenance of an online e-store for 3M Colombia (Compra3M) using PHP (Yii Framework) and MySQL: www.compra3m.com.co. I had to develop several modules to extend this framework such as a basket module, a checkout module, a FTP module (which was in charge of manage the stock sincronization process between the store and the 3M Colombia storage), etc.
- Maintenance and updates of several already existent sites developed with different tecnologies such as PHP, MySQL, Java (Struts) and PostgreSQL.

Freelance

2014-2015 **Backend/Frontend Web Developer**, *Ibermúsicas*.

Ruby on Rails, HTML, CSS, Javascript

Backend and Frontend development for the new Ibermúsicas website. Ibermúsicas is a program to promote iberoamérica cultura thourgh music and arts.

Other

2011-2012 **Web Developer & Co-Founder**, *Vitbok*.

Vitbok is a social network based in the idea of recreate a person's personal diary. In Vitbok you can share your "day by day" an then, afterwards, return and remember what you did that day. You can also post pictures and postits on your diary's page, dragging them to wherever you want. The postits are also helpful as reminders of future appointments.
